MOHAMADAYAN DESAI

Software Engineer | Java - Android - SQL | REST APIs | Python

Kolhapur, Maharashtra | +91 9309231376 | ayan2004desai@gmail.com
linkedin.com/in/mohamadayan-desai | github.com/ayan9309

SUMMARY

B.Tech Computer Science & Engineering graduate (2026, CGPA 8.12/10) from D.Y. Patil Agriculture & Technical University, Talsande. Completed an 11-month internship at RN Softwares & Consultors Pvt. Ltd., Kolhapur (Aug 2025 - Jul 2026) and was promoted to full-time Junior Android Developer. Delivered commercial apps — restaurant POS (XpressPOS), kitchen order ticket (Xpress KOT), Android TV kitchen display, sales CRM and call-log sync — using Java, REST APIs (Volley/JSON), SQL Server (SSMS) and SQLite, with Python data-science foundations. Emerging App Developer Award (Nov 2025); published in IRJMETS.

EXPERIENCE

RN Softwares & Consultors Pvt. Ltd. — Kolhapur, Maharashtra

Junior Android Developer (Full-time) | Jul 2026 - Present

Junior Android Developer Intern | Aug 2025 - Jul 2026 (11-month internship)

- **XpressPOS (restaurant POS)** — building the Java/Android point-of-sale app: API login; home screen with dining-section selector and CardView table grid; Menu/Cart screens with a one-time REST menu fetch into SQLite and manual "Sync Data"; Table Summary and bill settlement (Cash/Card/UPI/Cheque/NEFT — settle, credit, modify, cancel, bill-to-room, reprint); item-level actions; waiter/captain + PAX inputs; includes a reusable API-driven "User Authority" permission module; production APK delivered.
- **Xpress KOT (kitchen order ticket app)** — translated Figma wireframes to XML; built the Cart Activity with a dynamic font-size accessibility setting, a reusable parameterized custom alert-dialog module, previous-KOT history, and Transfer/Merge Table logic with atomic database handling; added role-gated "Cancel KOT" and customer-profile capture.
- **Kitchen Display (Android TV)** — card-based ready-KOT board for large screens with real-time REST sync to the Xpress Kitchen Screen backend; admin-adjustable font/card scaling; multi-resolution testing and deployment.
- **SQL Server (SSMS)** — executed ALTER TABLE schema migrations on live production data and diagnosed and recovered lost schemas/data on the live Xpress KOT database, restoring restaurant operations.
- **Xpress Sales CRM & Call Logs** — RecyclerView/CardView dashboards, Google Maps customer tracking and WhatsApp/call follow-ups; BroadcastReceiver + SQLite + WorkManager background sync for call logs, designed for Android 12-15 background-execution limits.
- **Aadhaar Smart Reader (team support)** — assisted a teammate's multi-document scanner app: login/home/scan UI flows, session handling, searchable history, Gemini API key configurable in Settings; produced a signed AAB build.
- **Foundation & daily stack** — training phase: SQLite CRUD to Volley/JSON APIs, Firebase Auth, Realtime DB offline persistence; daily stack Java, Android SDK, REST APIs, SQLite, SQL Server, Git, Logcat.

TECHNICAL SKILLS

Languages: Java, C/C++, Python, SQL, JavaScript, HTML/CSS

Android & Mobile: Android SDK, Activities & Fragments, XML layouts, RecyclerView/CardView, SQLite, SharedPreferences, Services, BroadcastReceiver, WorkManager, Volley + REST/JSON, Firebase (Authentication, Realtime Database), Google Maps SDK, material design, responsive & accessible UI, APK/AAB release builds

Backend & Data: SQL Server (SSMS — schema migrations, data recovery), MySQL, REST APIs, JSON, SQLite, Firebase

Python & Data Science: Pandas, scikit-learn, Jupyter, TF-IDF / cosine similarity

Tools & Platforms: Android Studio, Figma, Git/GitHub, Logcat, SSMS, AWS EC2 / VPC (project work)

PROJECTS

- **Restaurant Recommendation System** — content-based recommender using TF-IDF and cosine similarity (Python, Pandas); SmartBridge project certificate, May 2026.
- **AI-Enhanced Intrusion Detection System** — ML classifier distinguishing normal vs malicious network traffic (scikit-learn); SmartBridge, Jul 2026.
- **Pumpkin Seed Variety Classification** — supervised classification on seed features ("Harvesting Brilliance"); SmartBridge, Mar 2026.
- **AWS EC2 & VPC Hosting** — deployed workloads on EC2 inside a custom VPC using MobaXterm; SmartBridge, Jun 2026.
- **Location-Based Attendance System** — GPS-based Android attendance app; research paper published in IRJMETS.

EDUCATION

B.Tech, Computer Science & Engineering — D.Y. Patil Agriculture & Technical University, Talsande | CGPA 8.12/10 | 2023 - 2026

Diploma, Computer Science & Engineering (12th equivalent) — D.K.T.E. Yashwantrao Chavan Polytechnic, Ichalkaranji | 73.03% | 2020 - 2023

CERTIFICATIONS

- Cloud Practitioner - SmartBridge | Jun 2026
- Applied Data Science - SmartBridge in collaboration with Google for Developers | May 2026
- Artificial Intelligence - SmartBridge in collaboration with Google for Developers | Mar 2026
- Introduction to Generative AI - IBM SkillsBuild | Feb 2026
- Java Programming - Great Learning | Mar 2022

ACHIEVEMENTS

- Emerging App Developer Award, RN Softwares - Nov 2025
- Research paper published in IRJMETS: "The Location-Based Attendance System"
- Competitive programming: CODEVERT, ELECTROVERT 2K22-23 (Walchand College) and CRACKER 2K22 (Dr. J.J. Magdum College)
